

OPERATIONAL ASSESSMENT SERVICES

Bring Insight to Maximize Value in Business Transformation

THE ARMANINO ADVANTAGE

Armanino's Operational Assessment Services focus on a holistic view of your business strategy and processes now and for the future. Companies and nonprofits like yours have leveraged Armanino's insight to maximize value in business transformation.

THE CHALLENGES

All businesses are in transition – from expansion and growth to employee turnover and changing technologies. To maintain a competitive edge, it's essential to ensure your operations are streamlined to address evolving company and industry needs.

VALUE & PROCESS

Armanino's Operational Assessment approach includes a five-step approach to ensure your company's success.

- **Listen:** Engage with your team through interviews and in-person working sessions to understand the needs of your company and each department individually.
- **Assess:** Determine core issues, gaps and opportunities within your people, processes and technologies.
- **Analyze:** Develop best practices and benchmarks for your company within the industry and amongst your peers.
- **Report:** Discuss opportunities and understanding of process flows, gaps and new systems.
- **Recommend:** Define an optimal future for your company and lay out a roadmap to achieve your goals

As your business expands, evolves or as complexity increases, investing in an evaluation of your people, process and technology is a valuable way to prepare for future growth.

WHY IT MATTERS

Armanino's assessment services help finance and operations teams minimize time spent on low-value processes and increase time spent on strategic decision-making and growth activities. We enable business leaders to accurately evaluate the full spectrum of business processes, applications and your organization with a holistic lens.

Through understanding goals and objectives, evaluating existing practices, leveraging the full breadth of our firm's skills and experience, and identifying future state options, we enable our clients to achieve success in the short and long term. Our Operational Assessment roadmap will enable you to:

- Implement Best Practices
- Align Business Processes
- Eliminate Manual Tasks
- Scale for Growth
- Gain Clarity for Planning
- Respond to a Changing Environment
