

# How does Solver stack up?

It's time to modernize your financial planning and analysis. Compare key features Solver can offer against Microsoft Dynamics GP Management Reporter.

FEATURE		MANAGEMENT REPORTER
Live Reporting on ERP Database	 Yes, both LIVE (real-time) and data warehouse-based options available	 Live integration exclusively on Microsoft Dynamics ERP, but can configure connections to OLAP cubes or other data stores.
Web-Based User Interface	 Yes, modern web-based portal. Both available in the cloud (SaaS) and on premise (perpetual).	 On-premise deployment only.
Full CPM Suite / True Data Warehouse Architecture	 Solver can be deployed as a complete Reporting, Budgeting, Data Warehouse suite, including options for Power BI integrations or other dashboards.	 Data warehousing is not offered, so it is the customer's responsibility to pull non-Dynamics data from either an OLAP cube or a data warehouse. Does not offer budgeting or dashboards.
Deep Integration with ERPs	 Yes, includes deep, user-friendly & configurable ETL connectors plus option for live AX, NAV, GP, SL reporting with pre-integrated GL and sub-ledger fields.	 No, integrations are exclusively for GL data analyses off of Microsoft Dynamics products.
Report Template Layout, Flexibility & Dimensionality	 Virtually unrestricted report and input form design capabilities thanks to modern Excel add-in. 100+ dimensions with unlimited use of attributes for max flexibility. Dynamic rows and columns.	 Numerous report/form layout and calculation restrictions due to proprietary interface.
Innovative Web Portal Archive for Report Viewers	 Self-service web access to executed reports with drill-down, organized in categories, with playlists, split screen report comparison, and more.	 Not available.
Workflow	 Yes, optional workflow module for larger multi-user deployments.	 Not available.
Reporting & Consolidations	 Very flexible report writer thanks to Excel/web options. Full reporting and consolidation functionality, including currency, eliminations, adjustment, multi-ERP consolidations and more.	 Reporting is the focus for this retired tool, primarily for live integrations to Microsoft Dynamics products.
Budgeting & Forecasting	 Excel-design, web-based delivery offers best of both worlds.	 Not available.
